

FO3 - Ladders (Rev. 0)

	YES	N/A	LOI OBSERVED
1.			Are extension ladders inspected and in usable conditions?
2.			Are extension ladders placed on solid level footing?
3.			Are employees properly using extension ladders and not working off the top three rungs?
4.			Do extension ladders extend 3 feet above the dismount landing?
5.			Are extension ladders tied off in a manner which minimizes movement?
6.			Are step ladders (A-frame) inspected and in usable condition?
7.			Are step ladders opened up with locking mechanisms extended?
8.			Are employees using non conductive ladders for electrical work?
9.			Are A-frame ladders tied off in a manner which minimizes movement?
10.			Are employees properly using step ladders and NOT working off the top or the rung below the top?
11.			Personnel are setting up and using ladders properly. "Three Points of Contact" are maintained at all times to avoid a potential fall hazard.
