

FO32 - Tow Trailers (Rev. 0)

	YES	N/A	LOI OBSERVED
1.			Manufacturer Identification and Gross Weight Capacity clearly labeled and visible on trailer
2.			Trailer inspected prior to use
3.			Coupler hitch assembly is proper size and configured properly.
4.			Safety chains are properly attached and crossed to form a "cradle". (Note: This will keep the hitch from dragging the ground if it disengages from the coupler)
5.			All required safety pins are installed and secured properly.
6.			Tail lights and turn signals are in proper working condition
7.			Loaded equipment properly aligned on trailer
8.			Driver/Operator is provided fall protection when working Six (6) Feet or greater above ground on equipment platforms or operating stations
9.			Equipment tied down properly
10.			Personnel clear of equipment when loading/unloading
11.			Route of trailer verified prior to travel
12.			Transport escorts provided when required
