

# **Savannah River Site Fire Department**

**Training For Excellence  
“A True Success Story”**

# Idea Conceived

- In August 2002 the SRSFD Identified Ft Gordon as Training Site for Annual Burn
- Idea to incorporate RAD fire.
- Needed scenario for RAD fire and contaminated Pt transfer.
- Opportunity for FD and EP to work together.

# Scenario Developed

- FD and EP met to prepare scenario.
- EP developed training scenario.
- EP/Controller support for drills coordinated

# Plan In Action

- Training scenarios proved very beneficial for both FD and EP.
- Developed good relations between FD and EP
- Identified the need for contaminated FF dress down procedure.

# Continuous Improvement

- Contaminated FF dressdown procedure developed with the help of RCO.
- Fire department began training with the procedure.
- FF dressdown video developed.

# Successful Progress

- New training scenarios developed.
- The need for Facility Personnel to participate in drills identified.
- RCO, Facility Managers, WSI personnel participate in annual live fire training evolutions.

# Results

- Contaminated FF dressdown training video developed.
- RCO uses Video for re-qualification and new hire training.
- FF participates in RCO training to demonstrate dressdown procedure.
- Actual response to real world events.

# Video

- Video of Live Burn training
