Savannah River Nuclear Solutions Executive Named Chair of American Heart Association Executive Leadership Team

AIKEN, S.C. – (May 25, 2010) – The American Heart Association and Savannah River Nuclear Solutions, LLC (SRNS) is pleased to announce Mr. Jim Hanna, SRNS Vice President of Workforce Services, will serve as the chairman of the American Heart Association's Executive Leadership Team and chair the 2011 Start! CSRA Heart Walk.

The annual event, which raises funds to fight heart disease and stroke, America's No. 1 and No. 3 killers, is a non-competitive, three-mile walk including teams of employees from local companies, along with friends and family members of all ages.

Mr. Hanna is responsible for human resources operations for SRNS at the Department of Energy's Savannah River Site, which is one of the largest employers in South Carolina. Hanna has more than 28 years of management experience in industrial relations and human resources, including executive level positions within Fluor Government Group and Fluor Corporation. Hanna also led the 1997 March of Dimes and 1998 United Way campaigns for Fluor Hanford in Richland, Washington.

"We are excited to have someone with Mr. Hanna's leadership skills and experience to lead our team," said Valerie Bridges, American Heart Association Heart Walk Director. "As one of the largest fundraising walks in the country, it is vital to our success to have a strong volunteer leader to champion this effort," said Bridges.

In his new role, Mr. Hanna will lead an eighteen member Executive Leadership Team from major employers from the Augusta-Aiken area to foster participation and support for the CSRA Heart Walk within the business community.

"2011 marks the third year that SRNS will be the top sponsor of the walk, with a corporate contribution of \$25,000 annually to the American Heart Association," said Jim Hanna. "Our employees also surpassed their goal in 2010 and raised more than \$108,000 to fight cardiovascular disease," said Hanna.

SRNS, a Fluor-led company, is the management and operations contractor of the Savannah River Site near Aiken, South Carolina.

About the American Heart Association

Founded in 1924, the American Heart Association today is the nation's oldest and largest voluntary health organization dedicated to building healthier lives, free of heart disease and stroke. These diseases, America's No. 1 and No. 3 killers, and all other cardiovascular diseases claim nearly 870,000 lives a year. In fiscal year 2006–07 the association invested more than \$554 million in research, professional and public education, advocacy and community service programs to help all Americans live longer, healthier lives.
