Savannah River Nuclear Solutions, LLC Donates \$20,000 to Aiken Technical College

AIKEN, S.C. (February 26, 2009) – Savannah River Nuclear Solutions, LLC (SRNS) recently donated \$20,000 to Aiken Technical College (ATC) during their Annual Giving Campaign to be used as unrestricted funds. These types of funds are the most useful to the college as they can be designated for areas of greatest need, from student scholarships through faculty continuing education.

According to the director of the ATC Foundation, Mary Commons, the college is grateful for the contribution from SRNS. "Their gift will be directed to areas with the greatest need and the greatest potential for impact," said Commons.

Savannah River Nuclear Solutions, LLC President and CEO Chuck Munns explained that SRNS and ATC share a strong partnership towards achieving common goals in education. "We both have established and effective educational outreach programs developed to help those desiring a good education," said Munns. "In fact, SRS and ATC employees have been working productively together for a number of years."

SRS is owned by the U.S. Department of Energy and the management and operating contractor is Savannah River Nuclear Solutions, LLC.
