## **DOE Releases Request for Information/Sources Sought for Savannah River Site Liquid Waste Services**

**Cincinnati** -- The U.S. Department of Energy (DOE) today issued a Request for Information (RFI) / Sources Sought for Liquid Waste services at the Savannah River Site (SRS). The current Liquid Waste services contract at SRS is held by Savannah River Remediation, LLC and expires June 30, 2017.

The RFI/Sources Sought is seeking to solicit input via capability statements from interested parties with the specialized capabilities necessary to meet the requirements for the SRS Liquid Waste services. Within these capability statements, DOE is seeking feedback from contractors and other interested parties regarding options for innovative approaches for the performance of the major Elements of Scope as well as insight into potential contracting alternatives.

This market research will assist DOE with identifying interested and capable sources and developing its acquisition strategy. Key market research goals include identifying and minimizing barriers to competition, evaluating small business capabilities, identifying risks, identifying potential requirements definition and contract alternatives, and identifying appropriate request for proposal and contract terms and conditions.

An Industry Day will be announced at a future date.
