

Environmental Notice

Volume 9, Number 16
September 22, 1998

from the Savannah River Site

Modifications to RCRA requested

The U.S. Department of Energy (DOE)-Savannah River Operations Office has requested from the South Carolina Department of Health and Environmental Control (SCDHEC) modifications to Savannah River Site's (SRS) 1992 Resource Conservation and Recovery Act (RCRA) Part B Permit Renewal Application for Volume III, M-Area Hazardous Waste Management Facility.

The revision (Rev. 12) deletes 149 monitoring and recovery wells, alters some analyses at specific well locations, designates the Clean Air Act permit to specify the type and amount of treatment required for groundwater remediation off-gas, and allows for the use of new dense non-aqueous phase liquid

characterization and remediation technologies.

This notice begins a 60-day comment period. More information, including the actual permit application, is available for review and copying at the DOE Public Reading Room located in the University of South Carolina-Aiken library, or by contacting personnel listed below. The permittees compliance history during the life of the permit being modified is available from the Agency contact person.

A public meeting will be held November 3 at 3:00 p.m. at the Aiken County Public Library. Representatives from SRS will be available to answer questions.
