The United States Department of Energy (DOE), the United States Environmental Protection Agency – Region 4, and the South Carolina Department of Health and Environmental Control announce the availability of a Fact Sheet for the Early Construction and Operational Disposal Sites (ECODS) L-1, N-2, P-2, and R-1A, -1B, -1C Operable Unit (OU) at the Savannah River Site (SRS). The ECODS L-1, N-2, P-2, and R-1A, -1B, -1C Record of Decision (ROD), which was issued to the public on March 30, 2010, selected Institutional Controls as the remedy for the OU.

The remedial action selected for the ECODS L-1, N-2, P-2, and R-1A, -1B, -1C is:

**Institutional Controls:** Institutional Controls will be implemented to prevent land disturbance activities and to prevent exposure to subsurface soils that may contain friable asbestos. Institutional Controls will consist of access controls through the use of warning signs and the Site Use/Site Clearance program at SRS.

The ECODS L-1, N-2, P-2, and R-1A, -1B, -1C are shallow land disposal pits used between 1951 and 1955 to dispose of waste material associated with the construction of SRS facilities. The ECODS L-1 is located in the southern portion of the SRS. The ECODS N-2 is located in the central portion of SRS. The ECODS P-2 and the ECODS R-1A, -1B, and -1C are located in the southeastern portion of SRS.
