EXPERIENCE

Margaret A. (Peggy) Davis is Senior Vice President, Business Services, for Savannah River Nuclear Solutions (SRNS), the management and operations contractor for the Department of Energy's (DOE) Savannah River Site. In this role she is responsible for Contracts and Supply Chain Management, Finance, Information Technology, Internal Audits, Business Planning and Integration, and Enterprise Systems Solutions.

Davis has 30 years experience in business operations and financial management supporting DOE contracts. She has served as Chief Financial Officer, SRNL Business Support and Senior Vice President of Support Services for SRNS. Previously, she served as Controller at Fluor Hanford, the management and integration contract at DOE's Hanford site in Richland, Wash. She has also managed the Business Management Systems at Hanford, which provided financial, human resources, supply chain, and project reporting systems to multiple contractors at the site. Davis has also managed over \$3 billion in pension and benefit assets and has led financial teams in two separate enterprise business system implementations.

During her career, Davis has supported six separate DOE contracts at three sites within the complex. She has successfully led teams that collectively have reduced indirect costs to the government in excess of \$482 million cumulative, as well as implemented lifecycle cost savings strategies in pension and benefit management that exceed \$780 million and reduced benefit plan administration costs by 20 percent while keeping welfare benefits and the associated costs level.
