EXPERIENCE

Paul Hunt is Senior Vice President of Environmental Management Operations for Savannah River Nuclear Solutions (SRNS). He is responsible for safe execution of all environmental management operations at the Department of Energy's Savannah River Site (SRS). This includes completion of American Recovery and Reinvestment Act projects and consolidation of waste management assets and resources.

Hunt has 25 years of management experience in engineering and technical projects, including waste management facility operations and waste disposition, as well as Navy Nuclear technical and operational expertise.

Most recently he served as Vice President American Recovery and Reinvestment Act, responsible for completion of the \$1.4 Billion in cleanup projects. He served as Manager for Environmental Services for URS Washington Safety management solutions, where his responsibilities included strategic planning. He served as Manager for Environmental Services for URS Washington Safety Management Solutions, where his responsibilities included strategic planning and business development. He directed an international consulting team at the United Kingdom's largest nuclear weapons site, focusing on identifying and implementing cost-savings initiatives in life cycle decommissioning and waste management.

Hunt was also the manager of Waste Management Projects for West Valley Environmental Services, and worked for 17 years in waste operations at SRS, including deputy manager of the H Disposition Project and manager of Solid Waste Operations.

He has served in the U.S. Navy and the U.S. Navy Reserves from 1991 through the present. He attained the rank of Captain in 2005.
