

FO43 - Confined Space (Rev. 0)

	YES	N/A	LOI OBSERVED
1.			Work site has been evaluated for potential confined space hazard locations by a competent person
2.			All work site employees who could potentially enter a Permit Required Confined Space (PRCS) have been notified of the existence, location, and hazards of the space
3.			A designated competent person has evaluated all potential hazards and performed confined space monitoring using appropriate atmospheric monitoring equipment, where required, and documents the results on their specific Confined Space Entry Permit (note: When subcontractor personnel and WSRC personnel are working in the same location, WSRC performs the work area atmospheric monitoring. WSRC also performs atmospheric monitoring in radiological-controlled areas)
4.			Proper information is identified and completed on the Confined Space Entry Permit
5.			Confined space entrants, attendants, and supervisors fully understand their duties
6.			Authorized confined space supervisors, attendants, and entrants have been formally trained
