SRS Deer Hunts

Mobility Impaired and Wounded Warriors

Information on Cesium-137

- SRS monitors cesium levels in the environment and in all hogs/deer/coyotes released
 - Cesium exists in the earth's environment from historical atmospheric nuclear testing
 - Some past SRS operations have resulted in small Cesium releases
- SRS monitors all animals for Cesium-137 content. They track dose to hunters and animals will not be released should they exceed the conservative SRS limit.
 - Cesium is a radioactive substance
 - In the history of SRS hunts, only one deer has ever failed to meet conservative release limits.
