**NOTES:**

**April 2021 | Issue 0032**

**HSABank**

**Prudential**
April is Oral Health Month, a good time of year to take stock of your oral care routine and understand how proper oral health can have an impact on your overall well-being. This April, consider the preventive steps you can take to make sure your mouth and the rest of your body are healthy throughout the year.

**Schedule Regular Dental Appointments**
While brushing and flossing your teeth at home are important for removing plaque, you can't remove tartar on your own. You need to keep up with regular dental visits. Many people will need to see their dentists every six months for a routine cleaning and examination.

**Take Care of Your Smile**
Good oral hygiene is important for many reasons. Sore or bleeding gums, missing teeth, infections, and oral pain can all affect your ability to eat and talk. While we often think of our mouth as a separate part of our body, research reveals a connection between our oral health and certain chronic diseases, such as stroke, heart disease, and diabetes.

Below is the information regarding Preventive and Diagnostics for both Prime and Standard Dental plans:
