SRNS Builds First Habitat for Humanity Home in Jackson, S.C.

AIKEN, S.C., August 1, 2010 – A ribbon-cutting ceremony was held today, Sunday, Aug. 1, celebrating the completion of a new Habitat for Humanity house for a deserving family in Jackson, S.C.

This is the first Habitat for Humanity house built in Jackson, S.C., and the first Habitat for Humanity home sponsored by Savannah River Nuclear Solutions, LLC (SRNS).

SRNS donated \$50,000 to the project, which paid for all of the tools and building materials used to construct the three bedroom, 1,200 square-foot home.

Located on Coleman Street, near the intersection of North Silverton Street and Main Street, the structure took 12 weeks to complete using an all-volunteer workforce.

Approximately 400 SRNS employees, many using some of their own tools, worked long hours to ensure that Dena Garrett and her three children would move into a soundly built, high quality home. In addition to their efforts, several residents of Jackson contributed to the cause by painting most of the house and providing food for the construction crew each week.

“I’m so grateful to the workers from SRNS and to the Habitat for Humanity organization,” said Garrett. “Though this home is such a blessing, it’s not just a house, it’s an opportunity for me and our family.”

Garrett, who will return to Aiken Technical College this Fall, has lived with her mother for the last three years. “This new home means so much to us. To give back to others, I’m now volunteering time helping at the Habitat for Humanity office,” said Garrett.

This house represents the 80th Habitat for Humanity home built in Aiken County.

“I’m so proud of these employees,” said Fred Dohse, SRNS Executive Vice President. “This house was built with strong arms and big hearts. Many of the volunteers put in dozens of hours. Toward the end of construction, we had to turn away volunteers because they were not needed. Their dedication to helping others in need is truly moving.”

Habitat for Humanity is the fourth largest home building organization in the U.S.

Savannah River Nuclear Solutions, LLC, is a Fluor-Daniel Partnership comprised of Fluor, Northrop Grumman and Honeywell, responsible for the management and operations of the Department of Energy’s Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
