DOE Releases Draft Request for Proposal and Announces Pre-Solicitation Conference for Savannah River Site Liquid Waste Services

Cincinnati -- The U.S. Department of Energy (DOE) today issued a Draft Request for Proposal (RFP) for liquid waste services at the Savannah River Site (SRS). A contract that primarily includes cost-plus-award-fee contract line items for the purpose of providing liquid waste services at SRS is anticipated. The Draft RFP provides for full and open competition, and the Draft RFP includes requirements for meaningful work to be performed by small business concerns. The total estimated value of the contract is up to approximately $6B over the prospective period of performance of up to ten years, including the option period. The current liquid waste services contract at SRS is held by Savannah River Remediation LLC, and expires on June 30, 2017.

The purpose of the Draft RFP is to solicit input from interested parties to assist DOE in developing a Final RFP for this procurement. DOE invites all interested parties to thoroughly examine the Draft RFP and the accompanying procurement website in their entirety and to submit comments to DOE.

Additionally, a pre-solicitation, site tour, and one-on-one meetings with interested parties will be held during the week of April 18, 2016. Registration information is available via the procurement website.

The liquid waste services include but are not limited to: operations of existing radioactive liquid waste facilities for storage, treatment, stabilization, and disposal of waste; waste removal from tanks and tank closures; construction of additional saltstone disposal units; operation of the Salt Waste Processing Facility after facility commissioning, startup, and one year of operation; and liquid waste program and regulatory support.

Additional information is available via the procurement website at: https://www.emcbc.doe.gov/SEB/SRLiquidWaste/
