WORK**

Key Skilled Technician Apprenticeships

The Savannah River Site (SRS) Apprenticeship School is a structured workforce development initiative aimed at building a highly skilled, diverse workforce. Through partnerships with government agencies, educational institutions, and local communities, the program provides hands-on training, job-specific education, and professional development for apprentices across three key models.

The Key Skilled Technician Apprenticeship is focused on roles requiring interdepartmental collaboration and specialized skills, such as production operators and maintenance technicians. Registered apprenticeships last approximately 8 months to 4 years, during which apprentices complete on-the-job and classroom training while earning a scalable wage. Each program trains apprentices in the necessary processes to become a qualified employee in their specific discipline. Upon successful completion, participants receive a national, industry-recognized, and portable credential from the Department of Labor.
