

November 23, 2020

Dear CSRA School Administrator:

Savannah River Nuclear Solutions (SRNS), LLC is pleased to announce that applications for its 2021 Innovative Teaching Mini Grants Program are now being accepted.

What's NEW this year?

- ❖ **Educators may now submit grant applications online!** As we transition to electronic submission, grants may still arrive by mail.
- ❖ **Rule Change: Educators may only be associated with one (1) grant in any role, either as lead teacher or team member.**

To submit an application educators may go to www.srs.gov/general/outreach/edoutrch/mini_grant.htm (note there is an underscore “_” between the words mini and grant) click on “Submission Guidelines” and follow the step by step instructions to submit an electronic or “By Mail” submission. **The deadline for application submittals is March 5, 2021.** If we do not encounter unforeseen situations, all recipients (including team members) principals and superintendents will be invited to an awards reception scheduled in May. Reception invitations will be sent via e-mail with an electronic RSVP for your convenience.

SRNS is committed to assisting the local education community by rewarding innovative teaching methods with funds to enhance classroom experience in STEM. CSRA elementary/middle school educators are invited to submit a proposal for one of the three categories: CAT A = \$500.00, CAT B = \$750.00 or CAT C = \$1000.00.

Please encourage your educators to take advantage of this opportunity. If you have questions or need additional information, you may contact me at gladys.moore@srs.gov. I look forward to your teachers' participation.

Sincerely,

Gladys N. Moore, Innovative Teaching Mini Grants Program Coordinator
