**Welcome and Introduction:**

CAB member Rose Hayes opened the meeting by welcoming everyone. She asked everyone to introduce themselves, including online attendees. She began her committee update with a discussion of pending recommendations 293, 295, 296, 302, and 303. She also provided a brief background of each recommendation before introducing Mr. Paul Hunt from Savannah River Nuclear Solutions (SRNS), to begin his presentation.

**Presentation: Environmental Management Operations Under FY13 Continuing Resolution- Paul Hunt, SRNS**

Mr. Hunt stated the purpose of his presentation was to fulfill a request made by the NM Committee Chair. He provided a diagram, which helped illustrate the areas he would be addressing. He briefly explained several funding challenges SRNS has experienced while operating under the FY13 EM CR. He stated that due to a funding shortfall, the Department of Energy (DOE) and SRNS had to initiate FY 2013 scope reductions and efficiencies, including scope deferrals, cost saving measures, and implementing the Pension Relief Act. He continued
by explaining the funding overview for H-Canyon/HB-Line, K-Area, L-Area, and F-Area facilities will remain consistent with DOE’s five year plan and continues to support other agency funded missions. He stated that work force reduction, which included employee voluntary separations, staff augmentations, and reducing the amount of craft workers was a key cost saving measure. He mentioned that funding challenges for FY 2013 are still underway; however, actions are being enforced to ensure that SRNS continues to protect the environment, meet EM commitments, and support other agency missions.
