# BACK-UP SLIDES

# Budget Terminology

<b>President's Budget Request</b>	The Administration's proposed plan for managing funds, setting levels of spending, and financing the spending of the federal government. The document sent to Congress by the President in January or February of each year, as required by law (31 U.S.C. § 1105), requesting new budget authority for federal programs and estimating federal revenues and outlays for the upcoming fiscal year and for subsequent outyears. Although the title of the document is Budget of the U.S. Government, it represents proposals for congressional consideration.
<b>Congressional Mark-up</b>	Meetings where congressional committees work on language of bills or resolutions. For example, at Budget Committee mark-ups, the House and Senate Budget Committees work on the language and numbers contained in budget resolutions and legislation affecting the congressional budget process.

# Budget Terminology

<b>Continuing Resolution</b>	Legislation in the form of a joint resolution enacted by Congress, when the new fiscal year is about to begin or has begun, to provide budget authority for Federal agencies and programs to continue in operation until the regular appropriations acts are enacted.
<b>Appropriation</b>	The provision of funds, through an annual appropriations act or a permanent law, for federal agencies to make payments out of the Treasury for specified purposes. The formal federal spending process consists of two sequential steps: authorization and then appropriation.
<b>Reprogramming</b>	Shifting funds within an appropriation or fund account to use them for purposes other than those contemplated at the time of appropriation; it is the shifting of funds from one object class to another within an appropriation or from one program activity to another.
