

Summary Notes – April 16, 2019
Savannah River Site (SRS) Citizens Advisory Board (CAB) Facilities
Disposition & Site Remediation (FDSR) Committee Meeting

The FDSR Committee held a meeting on Tuesday, April 16, 2019, 5:45 – 6:45 pm, at the DOE Meeting Center in Aiken, SC. The meeting was also streamed online and posted to the CAB website and YouTube page. There was also time set aside for Committee discussion and public comments.

Attendees:

<u>CAB:</u> Gil Allensworth Betty Cook Ruth Hollingsworth Eleanor Hopson Doug Howard Narinder Malik Joyce Underwood	<u>DOE/Contractor/Other:</u> Avery Hammett, DOE-SR Michael Mickolanis, DOE-SR de’Lisa Carrico, DOE-SR James Tanner, S&K Logistics Heather McWilliams, S&K Logistics Federica Staton, S&K Logistics	<u>Agency Liaisons:</u> <u>Stakeholders:</u>
--	--	---

Committee Welcome: Joyce Underwood, Committee Chair
Ms. Underwood welcomed everyone to the meeting.

Point of Contact Status Update: Maxcine Maxted, DOE-SR
Ms. Hammett stated on April 5 & 6, 2019 SRS in conjunction with the US Forest Service and the National Wild Turkey Federation hosted the Annual Ultimate Turkey Hunt. The hunt is for wounded warriors and wounded impaired hunters. 24 hunters from six states took 20 turkeys. All hunters were badged and escorted by SRS site personnel. The groundwater treatment in P Area will begin in May and take around nine months. The silver fluoride injection project treats contaminated groundwater out in F and H Areas by capturing radioactive iodine 129. The silver fluoride injection campaign is 80% complete and it should conclude the week of May 6.

Ms. Hammett responded to questions from Committee members and the public. Mr. Mikolanis (DOE-SR) assisted with some of the questions.

Committee Discussion

Ms. Underwood wanted to discuss the Integrated Priority List (IPL) which was tabled at the March Full Board Meeting. Ms. Underwood stated the security section could be removed since it was considered Min Safe. Mr. Mikolanis said Security it’s okay to leave Security in the letter, even if it’s covered in Min Safe and it shows it’s still important to the CAB. Ms. Underwood said PBS 100 (which funds the CAB) should be removed because its self-serving.

Mr. Malik said he was interested in infrastructure improvement especially with F Tank Farm and about drinking water system at SRS. He said would bring these items up at the Waste Management Committee Meeting as well. Ms. Underwood said infrastructure should be high up on the IPL.

Mr. Malik said the 235-should be another top priority. Drawing from the March Full Board presentations, a recommendation will be coming out from Nuclear Materials (NM).

Mr. Allensworth asked if the group could discuss 235-F. Mr. Mikolanis said this committee meeting could discuss presentations but feedback on the presentations should be done at the NM meetings. Mr. Allensworth hoped FDSR would look more closely at infrastructure. Mr. Allensworth said he would like to simplify the letter and only list four main items. His number one item would be Liquid Waste.

Ms. Underwood said she liked the idea of making the list smaller. Ms. Underwood stated the Strategic Legacy Management Committee highlighted adding Payment in Lieu of Taxes (PILT). Mr. Allensworth admitted it is tough to select only a few items from a long list of needs. However, the CAB needs to look at the requests and prioritize what should be funded. He agreed in the importance of PILT but he doesn't think it should be in the top four.

Mr. Howard echoed Gil's desire to have four main priorities. He wants to "put the bottom line up front" on the document. Mr. Howard thinks listing four items will show DOE what they feel is truly important and it will grab their attention. He wants Infrastructure to be at the top of list.

Mr. Allensworth asked if the Advanced Manufacturing Collaborative (AMC) would fall to DOE. Ms. Hammett wasn't sure if the AMC falls to DOE or Savannah River National Laboratory. Mr. Allensworth wasn't sure where the \$50 million for the AMC would come from. Mr. Mikolanis wasn't sure. Ms. Underwood asked which committee would handle questions for the AMC. Mr. Mikolanis is not sure because SRNL no longer falls under NM. Currently it might fall to NM but DOE still has to look into it.

Ms. Underwood asked which committee would handle PILT. Mr. Mikolanis said PILT could be a 2020 Work Plan item. DOE would have to decide which committee would handle it.

Ms. Underwood reviewed the Open and Pending FDSR Recommendation: 359: Plant Indigenous Flowering Plants on Industrial Landfills, 360: Solar Generated Power Use at SRS, 361: Pollinator Management Plan. Recommendation 359 will remain open until a response is received on 361. Recommendation 361 was voted on at the March Full Board and Ms. Hammett said DOE is currently working on a response. A presentation at the September Full Board will help with Recommendation 360. It will be closed out after the September Full Board

Ms. Underwood asked if there were any questions about the March DHEC presentation. Mr. Mikolanis and Ms. Hammett provided some more background on the program.

Public Comment

No Public Comment

Ms. Underwood adjourned the meeting.

The next FDSR Committee meeting will be held June 25, 2019, 6:15 – 7:15 pm, at the DOE Meeting Center in Aiken, SC.

The online recording of this meeting can be located on the CAB website: cab.srs.gov
