

2nd Quarter 2025 Site ALARA Committee Meeting Minutes

September 15, 2025

Prepared by Diana Jennings

Prior to the commencement of the meeting, a quorum was established for the Site ALARA Committee and the Change Control Board. See attached roster.

Introduction/ Safety Topic

Roy Windham welcomed all attendees. He addressed the recent news reports concerning Cesium-137 contamination found in shrimp from Indonesia and additional contaminated items such as shoes and clothing. He emphasized the importance of being vigilant in case any contaminated items are inadvertently brought on-site and detected in the field.

Environmental ALARA Update

Eric Doman presented the Environmental ALARA Update up to June 2025. Refer to slides 4-6. There were no questions or comments.

2nd Quarter Performance Indicators

Diana Jennings reviewed the 2nd Quarter Performance Indicators, starting with M&O goals versus actual doses. Refer to slide 8. The following facilities exceeded or fell short of the ALARA Goal by more than +/- 25% and were required to provide explanations:

- **K-Area:** Derek Colligan requested a 1.5 rem reduction in ALARA Goals due to the completion of FCA work. He indicated that higher dose material is scheduled to be processed for the remainder of the year, anticipating increased quarterly totals. The board approved the requested change.
- **Tritium:** Ruby Parks reported a maintenance outage had resulted in lower personnel dose totals. No changes were requested for this quarter, but reevaluation is planned after this quarter's completion.
- **SWM:** Anthony Carraway noted that preparation for shielded container work led to less mining. Mining is expected to resume. No ALARA goal changes were requested.
- **INF:** Terry Pifer explained that only approximately 10% of monitored individuals were receiving dose. Given the diverse range of monitored groups, no changes were requested.
- **Centerra:** Ethan Vanfossen requested adjustments to Centerra's CY 2025 ALARA Goals due to a continued downward trend in dose totals. The request to reduce the total for CY 2025 from 2.5 rem to 1.5 rem was approved by the board.

LWO: The 2nd Quarter Performance Indicators were presented. Refer to slide 9. There were no comments or questions.

BSRA: The 2nd Quarter Performance Indicators were presented. Refer to slide 10. Kevin Webster stated that work was halted due to a Technical Safety Requirement (TSR) violation but should resume in the coming weeks. Crane issues have also delayed some work, impacting dose totals. The Mark 18 project is expected to start soon. No changes were requested at this time.

The discussion on radiological events for the 2nd Quarter followed. Refer to slide 11. There were no questions or comments.

There have been no intakes of radioactive material exceeding 100 mrem for CY 2025. Refer to slide 12.

Roy Windham concluded the meeting by commending all companies for their efforts in maintaining a low number of radiological events during the 2nd Quarter. He also reminded attendees of the SRNS Senior Management announcement that the general Administrative Control Level (ACL) for SRNS would be 2 rem for CY 2026 to support upcoming NNSA projects.

There were no additional comments or concerns, and the meeting was adjourned.

FDA Advises Public Not to Eat, Sell, or Serve Certain Imported Frozen Shrimp from an Indonesian Firm

Frozen shrimp imported from PT. Bahari Makmur Sejati is in violation of the Federal FD&C Act. Additional recalls have been added. FDA's investigation is ongoing

Product and stores affected (updated 9/2/2025)

Certain frozen shrimp products processed by PT. Bahari Makmur Sejati (doing business as BMS Foods), a company located in Indonesia.

To date, three firms have issued press for recalled products:

- August 21, 2025: [Southwind Foods, LLC Recall](#)
- August 22, 2025: [Beaver Street Fisheries, LLC Recall](#)
- August 27, 2025: [AquaStar \(USA\) Corp Recall](#) – Kroger Brand
- August 28, 2025: [AquaStar \(USA\) Corp Recall](#) – Aqua Star Brand
- August 29, 2025: [Southwind Foods, LLC Recall](#) – Expansion of original recall

Please see the [product descriptions](#) for these recalls below to determine whether you have any recalled product in your home. You can also access more information by going to the firms' recall announcements using the links above.

Gov't Seals Industrial Site After US Detects Radioactive Substance in Shrimp Exports

Jakarta. The Indonesian government has sealed off and isolated areas contaminated with radioactive Cesium-137 at the Modern Cikande Industrial Estate in Serang Regency, Banten, following reports of tainted shrimp exports to the United States.

Environment Minister Hanif Faisol Nurofiq said on Thursday that the government is coordinating with multiple agencies to contain the contamination and trace its source.

"The government has already taken security measures. We sealed and localized the affected areas together with the Banten Police, based on detector readings showing Cesium-137 emissions," Hanif told reporters in Jakarta.

Authorities suspect the contamination may be linked to iron and steel smelting industries located in the area. Investigators are probing whether industrial waste contributed to radioactive traces found in frozen shrimp exported to the US.
