Volume 37, Number 8

SRS SRPPF RCRA Pre-application Public Availability Session

The Savannah River Site (SRS) invites the public to an Availability Session from 4:00 to 7:00 p.m. on October 23, 2025, at the Nancy Carson Public Library (135 Edgefield Road, North Augusta, SC 29841). The Public Availability Session is an opportunity to engage with SRS before its submittal of the Resource Conservation and Recovery Act (RCRA) Part B permit application for the storage of hazardous waste associated with Savannah River Plutonium Processing Facility (SRPPF) operations. This meeting allows the community to receive information about waste management activities, ask questions, and provide input on issues and concerns.

SRPPF is located in F Area at SRS and establishes a capability at SRS for producing war reserve certified pits for the U.S. nuclear weapons stockpile. SRPPF operations will generate waste materials that will be regulated under RCRA as hazardous or mixed waste. The SRPPF hazardous waste treatment, storage, and disposal buildings will require a RCRA hazardous waste permit under the South Carolina Hazardous Waste Management Regulations.

Please contact Fallan Flatow at fallan.flatow@srs.gov or 839-746-1089 by 2:00 p.m. on Monday, October 20, 2025, if you have a disability and require reasonable accommodation to fully participate in this meeting.

For more information about SRS, visit <https://www.srs.gov/>

For questions regarding the SRPPF Public Availability Session, please contact Fallan Flatow, SRNS Corporate Communications
fallan.flatow@srs.gov
839-746-1089

The SCDES and SRS would like you to be aware that additional public notices will be published in the upcoming months. These notices are required by SCDES regulation and pertain to specific hazardous waste management activities ongoing at SRS. If you are interested in more information on upcoming notices, you can visit <https://www.srs.gov/general/pubs/envbul/ebindex.htm>
